Economical Hand Wheels come with round machined rim and two different platings to fit your budget. The hub center is drilled for easy modification and the wheel is tapped and ready for the handle (see part 355-50 - 355-59 and sold separately.) 8" sizes and larger comes with wavy inside rim for better gripping. This wheel has a slim cross section and is well proportioned. These come in three or five spoke models.

HANDWHEELS

The Stainless Steel Handwheel has both a wheel and revolving handle that are completely machined to a smooth finish. The dish type handwheel hub is center drilled to assist in drilling the hole size required.

This high quality cast iron wheel is superbly finished in a polished and satin chrome plating that is rugged in design and construction. The wheel is engineered with three offset spokes and has a square outside rim to enhance appearance. Spokes are angular. Available as two types: one with a hole for a handle and one without. The handle must be ordered separately.

HANDWHEELS

A high quality cast iron wheel in polished satin chrome. Specifications similar to 358 series, except that it come with a wavy rim for positive grip. These are ideal where heavy torque may be needed.

A low cost, yet exceptionally well made hand wheel. It comes with a round outside rim. The hub is center drilled with a 1/8" pilot hole in the hub center for easy modification. All un-modified surfaces are tumbled smooth.
